

Position of ATC Badges on the Brassard

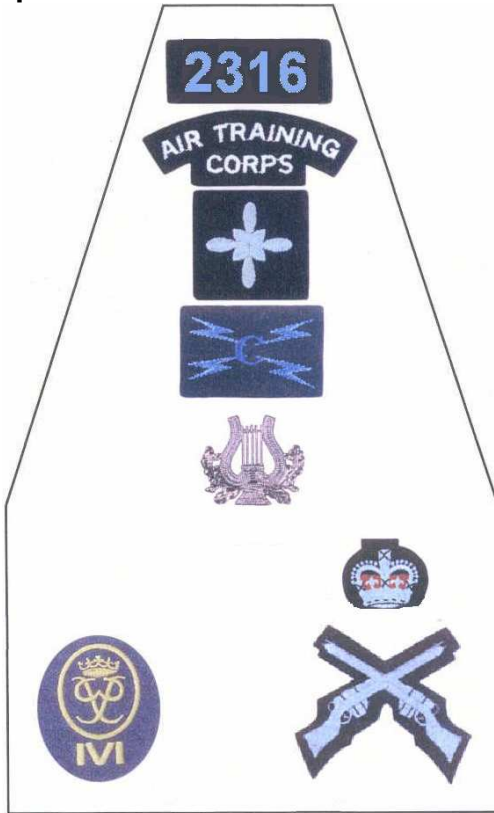

(from ACP 20B AI 204 AL 74, effective 01 January 2006)

Badges A, B and C are always present (Staff Cadets are to leave C blank). Other badges are applied in the order 1-6 as shown below, with certain badges always present. Badges designated as projects, including first aid, may fill spaces left vacant by higher-priority badges. Some examples of wear are presented overleaf.

ATC Badges on the Brassard - Examples

Example 1:

Notes:

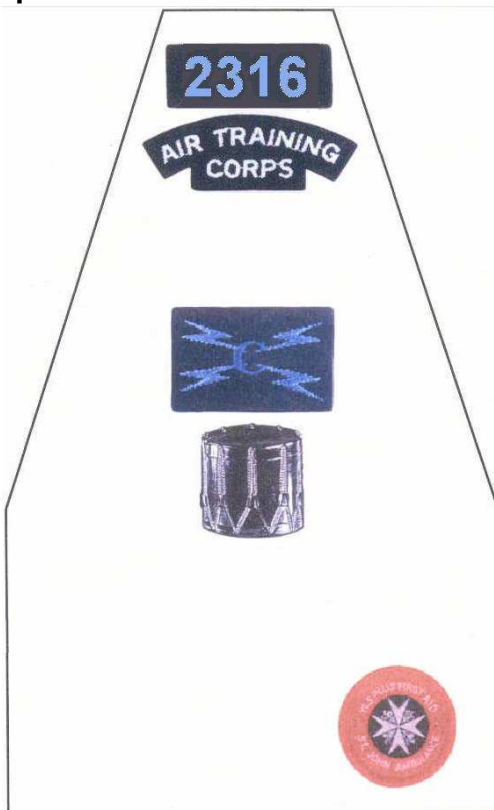

a) As both the MV and Marksmanship badges are available, no First Aid badge may be worn.

b) As the Corps Marksman has been gained, the crown is fixed so its bottom edge is 7.5cm from the bottom of the brassard.

c) If this cadet gains the Leadership Course Badge, one of the project badges would need to be removed.

d) If this cadet were also to gain the Nijmegen badge, this would be placed in a 'balancing' position on the left-hand side, with the bottom 7.5cm from the bottom of the brassard.

Example 2:

Notes:

a) This shows how a qualified Staff Cadet would wear a Communicator, Band and First Aid badge.

b) As previously, the project badges are worn centrally, but space is left where the classification badge rested.

c) Again, if this cadet gains either the Nijmegen or Leadership badges, one of the 'project' badges will need to make way.

d) As this cadet has yet to gain either a Marksmanship or MV, the First Aid badge should occupy the 'senior' space available for the Marksmanship badge.
